

Citroën Berlingo Electric L1 635 LX

Fuel Type:

Pure Electric

Engine:

49kW/67bhp synchronous electric motor, 22.5kWh lithium-ion battery

EV range (miles):

106 miles

Recharge in approx 10 hours

Co2 (g/km):

0g/km

Speed:

Limited to 110km/h (68.75)

L1 and L2 versions of the Citroën Berlingo Electric van can be recharged to 80 per cent of their capacity in 30 minutes from a 50kW (DC) CHAdeMO rapid charge point.

All Berlingo Electrics are also supplied with a 16A Type 2 charging cable which is compatible with more common public charging points (8 hours), while using a 13A household/domestic socket increases charging time to 10 hours.

Charging Costs Less than £2 pounds per 40 miles

LOAD CAPACITY OF UP TO 4.1 M³

L1 (available volume of up to 3.7 m³) and L2 (up to 4.1 m³), New Citroën Berlingo Electric offers you an optimal loading area thanks to its smart access points: large sliding side doors and asymmetric rear doors (opening to 180°). 2 Euro-pallets can be easily placed in the loading space even with the L1 version and its maximum payload capacity reaches 636 kg!
